Designer- Cheshire Architects / Year 2019

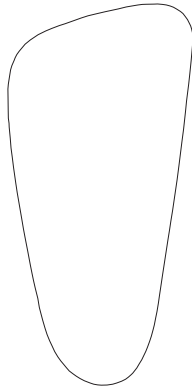

The Fulcrum Lamp is the modern re-expression of an archetype. Its free formed silhouette and re-positionable shade allow it to take on new forms from every angle, rendering it equally at home on an antique side table or plywood bench.

Fulcrums shade can be rotated with the gentle sweep of a finger, raising the light output from a soft glow to full brightness as the shade pivots through a sequence of cantilevered compositions.

Executed with a luxurious sand-cast bronze base and Japanese paper shade, the Fulcrum Lamp uses its classically rooted two-part format to explore a rich dialect of material and mass.
