

# IP65 SMALL LINEAR FIXTURES

## OUTDOOR

---

### Small IP65 linear fixtures

---

#### District XS

---

- Small linear downlights with symmetrical or asymmetrical light distribution.
- Linear fixtures available in 2 lengths 155mm and 295mm in a width of 62mm and height of 85mm.
- Protection rating against dust and moisture: complete IP65.
- Protection rating for resistance to harmful mechanical impacts: IK10.
- Powder painted extruded aluminium profile treated for corrosion resistance (nanophoresis) and covered with a polyester powder coating to guarantee durability. Textured paint finish.
- Special coating for environments with very high corrosivity is available under request. Highly efficient linear printed circuit board.
- A4 stainless steel locking screw. Optional A2 stainless steel vandal-proof screw.
- Protection polycarbonate diffuser in 4mm.
- Built-in driver.
- Anti-condensation device.
- Passive temperature management.

#### Suggested applications

Porches, canopies, façades, verandas, decks and outdoor spaces. They are also a good solution for interior spaces requiring little maintenance.

**District XS 300**

**Suggested applications:** porches, canopies, façades, verandas, decks and outdoor spaces. They are also a good solution for interior spaces requiring little maintenance.

District XS 100

Recessed

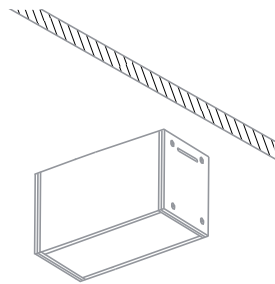

Ceiling-mounted using steel support with screws.

District XS 300

Surface-mounted

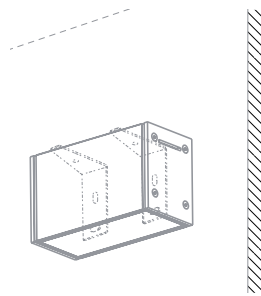

Ceiling-mounted using cleats.

District XS 600

Wall-mounted

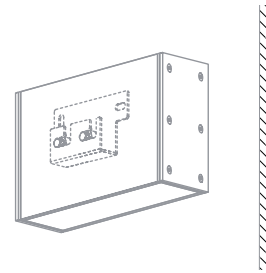

Wall-mounted by mounting brackets.

District XS 700

Wall-mounted  
Two-sided emission

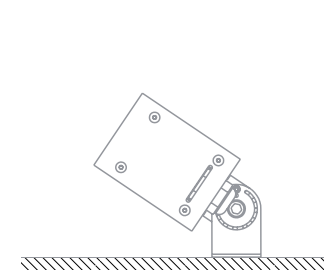

Wall-mounted by mounting brackets.

District XS 800

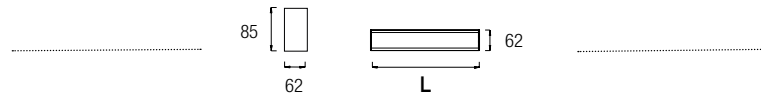

Projector

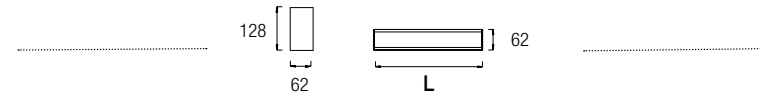

Ceiling, wall or floor installation with adjustable fixing brackets.

### Technical Details

# Bespoke solutions

If we don't already have it, we create it

The engineer from our technical team and the adaptability of our installations enable us to study, design and manufacture custom lighting systems based on the requirements and needs of each project.

Our **installations** are fully equipped with the necessary resources and the best **specialised professionals** to take on any custom order. Every project is painstakingly studied by our **technical team**, involving all stages of the creative and productive process: conceptualisation and **design of our products**; 3D modelling; prototype manufacture; and successful final production of the new product.

We develop **custom products** based on the requirements and needs of each project, and do so in partnership with everyone involved in the lighting project (lighting designers, architects and engineers). We always **adapt** to the needs of the project, manufacturing a new product from the ground up based on a simple functional description or working from sketches provided by a customer or external designer.

Furthermore, we can make minor modifications to products that already exist or create entirely new ones based on your design criteria.

**STAINLESS STEEL 316L Marine Grade**  
Available for: Watertight, Watertight Shallow, Watertight SQ, Dot, Lotus, Terra, Terra SQ, Victoria and Lithos.

**+ C5-M**  
**C5-M (Marine) COATING**  
Special coating for environments with very high corrosivity. Areas near to the coast and spaces with high salinity.

# **5 years guarantee**

Total quality,  
integral guarantee.

Quality lighting can only be created from quality luminaires. That's why ROVASI has always maintained a commitment to only offering premium products for our lighting solutions.

We only work with the best components. This enables us to offer a total guarantee that all the luminaires we design and manufacture meet the very highest quality standards and strictly comply with current regulations.

The quality of our products is translated into security and peace of mind once the project has been completed.

Because we want to share and transmit the benefits of this quality commitment with all our customers, all our range has a guarantee for 5
